

# Shop System™ Printer Specifications

The Shop System™ is the world's first metal binder jetting system designed specifically for machine shops—enabling shops to easily produce parts with exceptional surface finish and resolution at scale.

With production rates up to hundreds of green parts per day, the Shop System™ produces parts up to 10x faster than laser powder bed fusion<sup>1</sup>. Employing a ~1 pL droplet size, the Shop System™ achieves superior surface finish, bleed control and rich feature detail at high speed.

## Key benefits

- Turnkey system, from printing through sintering and powder recycling
- High resolution printing (1600 dpi)
- Maximum throughput of 800 cc/hr
- Configurable build envelope
- Print previously inaccessible complex geometry
- Flexible production from low-volume batches through mid-volume production
